Warehouse Star

Stock Transfer
Mobile App

No chaos after rearranging: There can be various reasons for relocating goods. With the **Stock Transfer** app, the storage locations in your Warehouse Management System stay up-to-date and transparent.

Your Benefits

- **Goods remain traceable:** Immediately upon completion of the relocation order, the new storage location is recorded in the system. This eliminates unnecessary effort in tracking relocated goods.

- **Create space for fast-moving items:** Your employees can quickly respond to increased demand for specific items and relocate other items from the front shelves using the mobile app.

- **Seamless integration:** Utilize the benefits of the integrated **Bitergo Warehouse Management** Solution and access other apps such as **Information**.

Functions and Features

Creating relocation orders

The basis for relocation are the relocation orders (MoveInventorys).

- Created as a pre-process or spontaneously in the app.
- Determining possible storage locations by querying multiple criteria (e.g., availability, accessibility).
- Set in the preferences whether the target storage location must be scanned for each relocation order.
- Decide whether the client should be displayed in the relocation order.

Processing relocation orders

The warehouse worker can view a list of possible relocation orders:

- Source and destination are displayed.
- Source storage location can be booked as empty or the quantity can be corrected.
- Optionally, the placement of a subset is possible.
- Cancellation of the relocation at any time is possible.
