Checklist

Requirements for a Warehouse Management System

The following checklist of goals and priorities for warehouse management will help you to evaluate the criteria of efficiency, accuracy, flexibility/scalability and data security based on specific operational requirements.

Bitergo

Priority	1 (very important)	2 (important)	3 (less important)
Efficiency:			
Maximum use of space			
Maximum turnover			
Controlling and stock optimization			
Cost reduction			
Simplyfied inventory			
Simplyfied processes			
Option to connect to ERP systems			
Accuracy:			
On-time delivery			
Reduced search effort			
Transparency of stock levels			
Simple and safe user guidance			
Flexibility / Scalability:			
Flexibility for product structure changes			
Flexibility in case of capacity fluctuations			
Options for warehouse growth			
Data security:			
Secure storage of data			
Automated data backups and data recovery			
Conformity with data protection guidelines			

We would be happy to advise you regarding your individual requirements in a personal consultation.
